

Sprout Assignment

Submitted by Mansi

Task 1 — Drawing and Coloring Activity

Concept	A simple interactive activity where children draw and color flowers, animals, trees, and stars using touch interactions.
Why it works	Children are naturally drawn to bright colors and intuitive touch-based play, making this activity engaging and age-appropriate.
Reward & Progress	Stars are awarded as rewards for completed drawings. Progress is saved automatically if time runs out, ensuring no work is lost.

Task 2 — Bubble Pop Game

Concept	A simple and fun bubble-popping game where children tap on bubbles to increase their score.
Target Age	Designed for children aged 3 to 5 years — easy to play and visually rewarding.
Tech Stack	HTML, CSS, JavaScript

Task 3 — Drop-Off Problem Analysis

Problem	Children tend to leave the app after approximately 2 minutes of engagement.
Root Causes	Possible reasons include slow performance, a confusing interface, or content that feels repetitive or boring.
Improvements	Enhance animations, reduce loading times, and introduce reward milestones to keep children engaged.
Success Metric	Increase in average session duration — longer playtime indicates higher engagement.

Task 4 — Camera Learning Feature

Feature Name	Find Fruits Around You
How it works	Children use their device camera to scan real fruits in their environment. The app detects the fruit and rewards the child with stars for each correct identification.
Tech Stack	React Native, Camera API, Google ML Kit
Learning Value	Bridges physical and digital play — reinforcing fruit recognition through real-world exploration and instant positive feedback.

"I enjoyed working on this assignment and tried to think in a simple and creative way."
